# CIRCULATION

VOLUME XXIX

JANUARY-JUNE, 1964

## SUBJECT INDEX

(Page numbers in *Italics* refer to abstracts)

### A

#### Acetylcholine

- effect of atropine on cardiovascular reactions elicited by, in conscious dog, 795
- effect on isolated heart from thiamine deficient rat, 468
- in supraventricular paroxysmal tachycardias, 796

#### Acetylstrophanthidin and experimental congestive heart failure, effect on myocardial electrolyte and water content, 628

#### Acid-base management for open-heart surgery, 456

#### Actin from heart muscle: isolation, purification and physicochemical properties, 801

#### Adenosine triphosphate

- anticoagulant action of, 626
- ouabain inhibition of cation activated, 796

#### Adrenaline. *See* Epinephrine

#### Adrenergic block

- beta, effects on circulation in patients with hypertrophic subaortic stenosis, 84
- beta-receptor blocking agent, therapy of hypotension with, 494
- induced by reserpine and guanethidine, neurotransmitter store and, 474

#### Aged, heart sounds in, 152

#### Airplane. *See* Aviation

#### Albumin, 1<sup>131</sup>

- pulmonary circulation time and pulmonary blood volume measured with, 802
- "radiocirculography" and pulmonary "radiocirculography" with, in cardiopathies, 634

#### Aldosterone

- antagonist (spironolactone) in congestive heart failure, 629
- hyperaldosteronism and hypergranularity of juxtaglomerular cells in renal hypertension: metabolic studies, 636
- influence on isometric tension development in rat heart, 804
- renin, angiotensin, and, 805
- secondary hyperaldosteronism, reduced vascular response to angiotensin II in, 800
- secretion in severe renal failure, 805

#### Alkalis, acid-base management for open-heart surgery, 456

#### Alpha-hydroxybutyric dehydrogenase. *See* Enzymes

#### Alternans, electrical, and pericardial tamponade, 635

#### Altitude, high, physiologic studies of pulmonary edema at, 393

#### Analog computer. *See* Computer, analog

#### Aneurysm

- abdominal aorta, surgery in, 475
- dissecting aortic, painless, 782
- postinfarction ventricular: four-year follow-up of surgically treated cases, 961
- sinus of Valsalva, and aortic insufficiency simulating rheumatic heart disease, Ehlers-Danlos syndrome with, 965
- of thoracic aorta, 176

#### Angina pectoris

- preceding initial myocardial infarction, 318
- radioelectrocardiography during exercise in, 366

#### Angiocardiography

- biplane method for determining left ventricular mass in man, 666
- retrograde left ventricular, and aortography, 34

#### Angiography

- comparison of left ventricular volumes by, 155
- complications of (in children), 639
- normal cerebral, effect of changes of end expiratory carbon dioxide tension on, 959
- serial, cerebral circulation time in cerebral vascular disease measured by, 958
- of systemic pulmonary circulation, 960

#### Angiotensin

- effect of atropine on cardiovascular reactions elicited by, in conscious dog, 795
- in man, 479
- plasma angiotensinase activity in hypertension and edema, 148
- plasma vasoconstrictor activity in renal, malignant, and primary hypertension, 409
- renin, and aldosterone, 805
- response of normal retinal blood vessels to, 151
- study of left ventricular function in man by increasing resistance to ventricular ejection with, 739

#### Angiotensin II

- effect on intact forearm veins of man, 799
- hemodynamic effects of, 153
- in patients with essential hypertension, infusion of synthetic, 523
- reduced vascular response to, in secondary hyperaldosteronism, 800
- renal effects of infusions in normotensive pregnant and nonpregnant women, 805

#### Animals

- monkeys, renin in experimental renal hypertension in, 147
- rhesus monkeys, atherosclerosis in, 623
- rat, hypertension, thrombosis, and atherosclerosis in, 142

#### Ankylosing spondylitis, chest pain of, and differential diagnosis of heart pain, 629

#### Antibiotics, etiology of bacterial endocarditis before and since introduction of, 635

#### Anticoagulants

- action of adenosine triphosphate, 626
- for atrial fibrillation, 143

- controllability of cumethoxethan, bishydroxycoumarin, and acenocoumarol, 314  
 thrombosis in systemic lupus erythematosus despite, 623  
 vitamin B<sub>6</sub>: comparative study with hydroxychloroquine sulphate in vitro, 626  
*See also* specific drug
- Antithrombin activity**, hypercoagulability, plasminogen activator activity, and, 624
- Aorta**  
 aneurysm  
   abdominal, surgery in, 475  
   painless dissecting, 782  
   thoracic, 176  
 congenital valvular stenosis, poststenotic aortic dilatation as a roentgen sign in, 960  
 dissection during translumbar and retrograde abdominal aortography, 958  
 of rats with renal hypertension, cholesterol synthesis in, 636  
 sinus, arteriosclerosis of, 150  
 stenosis  
   ABC electrocardiographic assessment of left ventricular pressure and gradient in, 634  
   isoproterenol in, 477  
   syphilitic aortitis, 346
- Aortic arch**  
 atresia: vertebral grand larceny, 911  
 vascular rings of, 959
- Aortic valve**  
 localization of, by intracavitary electrocardiography, 762  
 operative approach to congenital stenosis in childhood, 962  
 regurgitation, ventricular septal defect with, 862  
*See also* Stenosis, aortic
- Aortography**  
 abdominal, aortic dissection during translumbar and retrograde, 958  
 intravenous, 957  
 retrograde left ventricular angiocardiology and, 34
- Aramine**. *See* Metaraminol
- Arrest, cardiac**  
 electrocardiographic observations during and after anoxic arrest for open-heart surgery, 960  
 resuscitation in 126 medical patients, 639
- Arrhythmias**  
 cardiac  
   atrial tachysystole with block, 614  
   effect of calcium chelation on digitalis-induced, 798  
   induced by ouabain in intact dogs, 798  
   ventricular, influence of reserpine and B TM 10 on digitalis-induced, 797  
*See also* specific condition
- Arteries**  
 blood pressure, transducer for continuous external measurement of, 149  
 center of arterial pressure regulation during rotation of normal and abnormal dogs, 803  
 conduction of cardiovascular sound along, 146  
 femoral and popliteal, reconstructive surgery for occlusive disease of, 963  
 hereditary factors: a neglected and promising kind of anatomic research, 325  
 peripheral embolism, 316  
 production of lesions by humoral factor in parabiotic rats, 638  
 retrograde arterial catheterization of left heart, 787  
 severed, vascular reactions in spontaneous closure of, 638  
 sinus node, bradycardia during injections into, 155  
*See also* specific artery
- Arteriography**, selective coronary, in man, 958
- Arteriosclerosis**  
 of aortic sinuses, 150  
 effect of vitamin C on serum cholesterol in hypercholesterolemia and, 24  
 fatty acid composition of human lymph and serum lipoproteins after single feedings, 622  
 feedback control of cholesterol synthesis in man, 623  
 lipid metabolism and heart disease in Israelis, 313  
 obliterans, thromboangitis obliterans and, clinical and prognostic differences, 965  
 transaminase activity in, 622  
*See also* Atherosclerosis
- Arteriovenous fistula**  
 carotid-jugular, circulatory dynamics in, 905  
 cyanosis, cardiomegaly, and weak pulses: manifestation of massive congenital systemic, 777
- Arthritis**  
 juvenile rheumatoid, pericarditis in, 634  
 valvular and myocardial disease in patients with chronic joint deformity, 477
- Aspirin**, in therapy of severe rheumatic carditis, comparison of adrenocortical steroids and, 813
- Atherosclerosis**  
 autopsy study of, at Madras, south India, 546  
 behavior patterns, blood lipids and coronary disease, 142  
 coronary, in north India (Delhi area), 145  
 in Europeans and Bantu, 415  
 fat and fatty acids in pre-established atheromata, 313  
 pathogenesis of spontaneous plaque, 622  
 peripheral, segmental distribution, 623  
 in rat, hypertension, thrombosis, and, 142  
 in rhesus monkeys, 623  
 stenotic, compensatory adjustments in structure of coronary arteries of heart with, 447
- Athletes**, circulatory studies in, at rest and during exercise, 152
- Atresia**, pulmonary, with intact ventricular septum, 628
- Atrioventricular conditions**  
 complete block caused by primary cardiac sarcoma, 964  
 severe intravascular hemolysis following surgical repair of endocardial cushion defects, 963
- Atrium**  
 extreme left atrial enlargement, 14  
 flutter secondary to digitalis toxicity, 593  
 fibrillation  
   anticoagulants for, 143  
   conversion to sinus rhythm by DC shock, 479  
   in flying personnel, 694  
   in mitral valve disease, 477  
 influence of ouabain on contractile resting force tension, Ca<sup>45</sup> entry and tissue Ca content in rat, 152

- interatrial communication: mitral valve disease complicated by left-to-right shunt at atrial level, 432
- left
- hemodynamic variables affecting relation between mean left atrial and left ventricular end-diastolic pressures, 804
  - isolated congenital mitral insufficiency and left heart volumes, 356
- mitral valve disease complicated by left-to-right shunt at atrial level, 432
- polyuria in paroxysmal flutter and fibrillation, 473
- pressures and cardiac size in newborn infant, 469
- relationship of azygos venous system to normal atrial situs in levocardia, 901
- septal defect in infancy, 627
- tachysystole with block, 614
- Atropine**, effect on cardiovascular reactions elicited by catecholamines, angiotensin, histamine, serotonin, and acetylcholine in conscious dog, 795
- Auscultation**
- and phonocardiographic features of tricuspid stenosis, 26
  - and phonocardiography in healthy children with systolic murmurs, 469
- AV block**. *See* Heart, block
- Aviation**
- atrial fibrillation in flying personnel, 694
  - Wolff-Parkinson-White syndrome as a risk in, 672

## B

- Bacterial endocarditis**
- etiology before and since introduction of antibiotics, 635
  - surgical correction of mitral incompetence from, 475
- Ballistocardiogram**, and nicotine, 632
- Bantu**
- atherosclerosis in Europeans and, 415
  - coronary heart disease: limitations to application to white populations of lessons learned from underprivileged, 1
- Bases**. *See* Alkalis
- Behavior patterns**
- blood lipids and coronary heart disease, 142
  - type-A, serum lipids and conjunctival circulation after fat ingestion in men exhibiting, 874
- Beta adrenergic receptors**. *See* Adrenergic block
- Blood**
- abnormal globulins in myocardial infarction, 317
  - acute red cell volume increments, myocardial blood flow and oxygen uptake during, 803
  - factors II, VII, IX and X during treatment with coumarin, 314
  - fibrinolytic activity from veins and venous thrombi, 142
  - lipids, behavior patterns, and coronary heart disease, 142
  - pH and digitalis toxicity, 151
  - platelets during heparin therapy, 315
  - rheology in cardiovascular diseases, 624
  - severe intravascular hemolysis following surgical repair of endocardial cushion defects, 963

*Circulation, Volume XXIX, June 1964*

- Blood flow**
- and cardiac output during acute hypoxia in anesthetized dog, 802
  - cerebral, blood pressure and, 637
  - coronary flow equivalent, determination with coincidence counting technic, 833
  - direction in coronary arteries arising from pulmonary trunk, 163
  - effects of small oral doses of reserpine on vascular responses to tyramine and norepinephrine in man, 219
  - myocardial
    - blood perfusion in man with radioactive potassium or rubidium and precordial counting, 195
    - and oxygen uptake during acute red cell volume increments, 803
  - organ, of rats, effect of serotonin on cardiac output and, 468
  - systemic, with and without heart disease, 469
  - peripheral, in intermittent claudication, 479, 637
  - pulmonary
    - respiratory and cardiovascular function in severe pulmonary hypertension, 825
    - in rabbit, induced changes in pattern of, 801
- See also* Circulation; Hemodynamics
- Blood pressure**
- apparatus, automatic electronic, 147
  - arterial, transducer for continuous external measurement of, 149
  - and cerebral blood flow, 637
  - drug-induced reduction in "benign" hypertension, freedom from cerebral vascular accidents and, 148
  - effects of small oral doses of reserpine on vascular responses to tyramine and norepinephrine in man, 219
  - high, merits of reducing, 148
  - reduced vascular response to angiotensin II in secondary hyperaldosteronism, 800
  - therapy of hypotension with adrenergic beta-receptor blocking agent, 494
  - variations in hypertensives during sleep, 149
- See also* Hypertension; Hypotension
- Blood vessel(s)**
- healing of vascular grafts: experiments with a porous membrane, 962
  - hemodynamics of large and small vessels in peripheral vascular disease, 847
  - mechanical suture in operative surgery of, 961
  - microcirculation: effects of guanethidine and reserpine, 798
  - normal retinal, response of, to angiotensin and noradrenalin, 151
- See also* under specific blood vessel
- Blood volume**
- pulmonary
    - in man, studied by quantitative radiography, 800
    - and pulmonary circulation time measured with  $^{131}\text{I}$  albumin, 802
    - and pulmonary hemodynamics in cardiac patients, 143
- Body position**
- center of arterial pressure regulation during rotation of normal and abnormal dogs, 803
  - circulatory studies in athletes at rest and during exercise, 152
  - hemodynamic and ventilatory effect of exercise in upright position in left-to-right shunts, 99
  - tilting, reserpine and circulatory responses to, 149
- Body size**, cardiac output and, 470

- Bradycardia**, during injections into sinus node artery, 155
- Bradykinin**, synthetic, circulatory alterations induced by infusions in man, 66
- B TM 10**, influence on digitalis-induced ventricular arrhythmia, 797
- Bundle-branch block**, transient, 730

## C

- Caffeine**, effect on cardiac contractile activity and radiocalcium movement, 802
- Calcium**  
chelation in digitalis-induced cardiac arrhythmias, 798  
effect of caffeine on cardiac contractile activity and radiocalcium movement, 802  
flux in mammalian ventricular myocardium, 154

auscultatory and phonocardiographic features of, 26  
congenital, with pulmonary atresia, 143
- Sterilization**, cold, of cardiac catheterization equipment with ethylene oxide gas, 892
- Steroids**, adrenocortical, and aspirin, comparison in therapy of severe rheumatic carditis, 813
- "Straight back syndrome."** See Kyphosis
- Streptococci**, missing links in streptococcal chain leading to rheumatic fever, 488
- Streptokinase** infusions in thromboembolic disease, 625
- Subclavian steal syndrome.** See Vertebral artery
- Supraventricular parasystole**, 440
- Surgery**  
in abdominal aortic aneurysm, 475  
correction of mitral incompetence from bacterial endocarditis, 475  
healing of vascular grafts: experiments with a porous membrane, 962  
heart block, 475  
kidney function after renal revascularization for hypertension, 376  
lumbar sympathectomy, 963  
mitral commissurotomy  
hemodynamic studies after, 962  
long-term results, 961  
postcommissurotomy (postpericardiectomy) syndrome, 963  
myocardial revascularization, some observations on, 963  
open-heart  
acid-base management for, 456  
electrocardiographic observations during and after anoxic arrest for, 960  
operative approach to congenital aortic stenosis in childhood, 962  
postinfarction ventricular aneurysm: four-year follow-up of surgically treated cases, 961  
pulmonary embolotomy with cardiopulmonary bypass, 314  
reconstructive, for occlusive disease of femoral and popliteal arteries, 963  
recurrent symptoms after mitral valvuloplasty, 476  
severe intravascular hemolysis following repair of endocardial cushion defects, 963  
stapler: mechanical suture for cardiac defects and large blood vessels, 961  
Trendelenburg operation for varicose veins, 961  
vein grafts in the venous system, 962
- Sympathetic nervous system** stimulation, ventricular distensibility and pressure-volume curve during, 471
- Syphilitic aortitis**, 346
- Systole**  
effect of digitalis on ventricular ejection in normal humans, 721  
left ventricular, duration of phases, 472

## T

- Tachycardia**  
paroxysmal, polyuria in, 473  
supraventricular paroxysmal, acetylcholine in, 796
- Tachysystole**, atrial, with block, 614
- Tamponade**, pericardial, electrical alternans and, 635
- Tension**, isometric, development in rat heart, influence of aldosterone on, 804
- Tension-time** relationships, isometric, as an index of myocardial contractility, 471

**Tetracycline analogs**, fixed, in myocardial infarction, fluorescence of, 145

**Tetralogy of Fallot**

congenital pericardial defect associated with, 132  
hemodynamic studies after repair of, 583

**Thiamine** deficient rat, effect of acetylcholine on isolated heart from, 465

**Thiomerin**. *See* Mercaptomerin

**Thromboangitis obliterans** and arteriosclerosis obliterans: clinical and prognostic differences, 965

**Thromboembolism**

disease, streptokinase infusions in, 625  
radiology of obliterative pulmonary hypertension and, 957

**Thrombosis**

bioassay method in phlebothrombosis, 315  
blood fibrinolytic activity from veins and venous thrombi, 142  
chronic, of pulmonary arteries treated by thrombendarterectomy, 314  
deep venous, after fractures of tibial shaft, 624  
experimental venous, and thrombectomy, 626  
hypertension, and atherosclerosis in rat, 142  
intracardiac in endomyocardial fibrosis in Uganda, 319  
renal vein, nephrotic syndrome in, 626  
in systemic lupus erythematosus despite anticoagulants, 623

**Tibial shaft**, deep venous thrombosis after fractures of, 624

**Time-tension** relationships, isometric, as an index of myocardial contractility, 471

**Transaminase** activity in arteriosclerosis, 622

**Transducer** for continuous external measurement of arterial blood pressure, 149

**Transfusion**, exchange, electrocardiogram during, 634

**Transit time**, pulmonary, and pulmonary blood volume measured with  $I^{131}$  albumin, 802

**Transposition**

of great vessels  
complete, unusual longevity in case with subpulmonary stenosis, 610  
corrected, diagnosis of, 143  
corrected, and other anomalies of cardiac polarity, morphogenesis of, 71

**Transseptal puncture**, left-sided catheterization by, 631

**Tricuspid valve**

some auscultatory and phonocardiographic features of tricuspid stenosis, 26  
congenital stenosis with pulmonary atresia, 143

**Triglycerides**, hypertriglyceridemia in gout, 508

**Tubular excretion**, renal hemodynamics, and urine-concentrating capacity in separate kidneys of subjects with essential hypertension, 636

**Tumors**

carcinoid heart disease with left-sided lesions, 253  
complete atrioventricular block caused by primary cardiac sarcoma, 964

intramural fibroma of heart, 476

pheochromocytoma

catecholamine excretion in normals and cases of, 467

cyanotic malformations of heart with, 750

**Two-step test**. *See* Master two-step test

**Tyramine**

and norepinephrine in man, effects of small oral doses of reserpine on vascular responses to, 219  
pressor effect in man and reserpine pretreatment, 156

**U**

**Uganda**, intracardiac thrombosis and embolism in endomyocardial fibrosis in, 319

**Uremia**, aldosterone secretion in severe renal failure, 805

**Urine** concentrating capacity, renal hemodynamics, and tubular excretion in separate kidneys of subjects with essential hypertension, 636

**V**

**Vagus nerve**, cardioinhibitory carotid sinus reflex as a vagocardiosensitivity test, 318

**Valsalva maneuver**

cardiac and circulatory consequences of, 154  
and nitroglycerin, circulatory response in idiopathic hypertrophic subaortic stenosis, 422

**Valsalva, sinus of**

aneurysm and aortic insufficiency simulating rheumatic heart disease, Ehlers-Danlos syndrome with, 965  
arteriosclerosis of aortic sinuses, 150

**Valve**

regurgitation, effect of pressor amines on experimental intracardiac shunts and, 803  
*See also* under specific valve

**Varicose veins**, continuous compression technic for injecting, 478

**Vectorcardiogram**

comparison of several corrected leads, 533  
frontal plane QRS loop in normal heart and diaphragmatic myocardial infarction, 631  
linear, analog computer used in recording 632  
residual of inferior infarction (Frank system), 562  
spatial, electrocardiogram, and ventricular gradient during first week of life, 631  
upright T waves in  $V_1$  and  $V_2$  in first months of life, 318

**Vein(s)**

blood fibrinolytic activity from, and venous thrombi, 142  
experimental thrombosis and thrombectomy of, 626  
forearm of man, effect of angiotensin II on, 799  
gangrene of venous origin, 479  
grafts in the venous system, 962  
inflow volume and magnitude of QRS potentials in vivo, 145

left innominate, transient compression of, 758  
 of leg, radiologic study of deep fascia and communicating, 478  
 obstruction and fibrinolysis, 626  
 relationship of azygos venous system to normal atrial situs in levocardia, 901

varicose  
 continuous compression technic of injecting, 478  
 Trendelenburg operation for, 961

**Vena cava**, superior, chronic obstruction due to histoplasmosis, 604

**Ventilatory effects**, hemodynamic and, of exercise in upright position in left-to-right shunts, 99

## Ventricle

cardiac dimensions in intact, unanesthetized man:  
 effects of isoproterenol and methoxamine, 186  
 contraction, effects of atrial and ventricular pacing on synchronicity of, 154  
 digitalis-induced ventricular arrhythmia, influence of reserpine and B TM 10 on, 797  
 distensibility and pressure-volume curve during sympathetic stimulation, 471  
 effect of digitalis on ventricular ejection in normal humans, 721  
 effect of ryanodine on cardiac muscle, 797  
 ejection  
 initial ventricular impulse, 268  
 study of function in man by increasing resistance to, with angiotensin, 739  
 fibrillation, procaine amide in, 798  
 function in closed-chest unanesthetized dogs, Starling's law, 472  
 functional changes after crushing sinoauricular node, 156  
 gradient, electrocardiogram, and spatial vectorcardiogram during first week of life, 631  
 hilum and large left, 474  
 intact septum, pulmonary atresia with, 628  
 left  
 cardiac myopathy, probably of congenital origin, 768  
 heart rate and volume in dogs, 153  
 hemodynamic variables affecting relation between mean left atrial and left ventricular end-diastolic pressures, 804  
 hypertrophy in normal male population, QRS voltage criteria for, 224  
 indicator-dilution curves from, used to detect aortic regurgitation, 477

isolated congenital mitral insufficiency and left heart volumes, 356  
 mass in man, method for determining, 666  
 pressure and gradient in aortic stenosis, ABC electrocardiographic assessment, 634  
 retrograde left ventricular angiocardiology and aortography, 34  
 systole, duration of phases of, 472  
 tension and stress in man, 803  
 volumes, comparison of, by dye dilution and angiography, 155  
 volumes in valvular heart disease, 887  
 myocardium, calcium flux in mammalian, 154  
 postinfarction aneurysm: four-year follow-up of surgically treated cases, 951  
 pre-excitation, electrocardiogram in, 633  
 premature contraction in diagnosis of ischemic heart disease, 144  
 septal defect  
 with aortic regurgitation, 862  
 in patients surviving infancy, natural history of, 914

## Vertebral artery

roentgen manifestations of the subclavian steal syndrome, 960  
 vertebral grand larceny, 911

## Vitamins

B<sup>6</sup>, new anticoagulant: comparative study with hydroxychloroquine sulphate in vitro, 626  
 C, effect of, on serum cholesterol in hypercholesterolemia and arteriosclerosis, 24  
 K, deficiency, preprothrombinemia in, 625

## W

**Warfarin** in man, pharmacodynamics of, 625

**Weight** of left ventricle in man, method for determining, 666

## Wolff-Parkinson-White syndrome

as an aviation risk, 672  
 delta wave in, 146  
 electrocardiogram in ventricular pre-excitation, 633

**Wy-3654**, pteridine diuretic, 798
